

Petition for Protecting our Military from International Control

Citizen Soldier Protection Act

Whereas, there is a movement among globalists to internationalize our military, reducing sovereign national control and increasing control by the United Nations and other international agencies, we stand in the gap to defend those men and women in uniform who defend our nation – the US Military! Toward that end, we respectfully request our Congressmen to introduce, sponsor and work for the passage of this critical legislation that will serve to keep our nation sovereign by keeping our military sovereign.
